TPI-FSU Jena, 10-12 June 2024

EOB@Work is the third of a series of workshops aimed at starting a collaborative research effort at the frontiers of effective-one-body (EOB) development. This year's edition is dedicated to:

The interplay between conservative and dissipative dynamics

- Pathways to include post-Minkowskian information in the conservative EOB sector;
- The modeling of horizon absorption in the comparable and extreme-mass-ratio limits;
- Synergies and requirements from numerical relativity.
